# ALUMINUM STOREFRONT ENTRANCES ARE HERE!

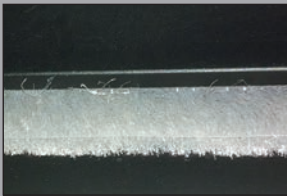

## EXPI-DOOR® expands our offerings once again.

We are proud to announce that we can now service our customers with yet another innovative, attractive opening for your new building. We don't just offer you a strong, secure, long-lasting, heavy-duty exit door. Why only limit ourselves to back doors? The front entrance of your building tells clients and tenants that you care about security as well as cleanliness and order! All of the Storefront Entrance openings we offer for your new building are narrow stile entrances with a 10" tall bottom rail for ADA consideration to meet a broad range of traffic requirements. EXPI-DOOR® offers what we feel is a superior price when compared to our competitors.

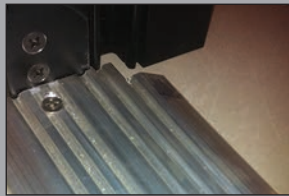

Our standard offerings cover all requirements including ADA Compliancy, Life-Safety Compliancy AAMA and ANSI requirements.

We offer a single 3' x 7' entrance as well as a paired 6' x 7' opening. Both are available with sidelites or transoms in the size of your choice. All doors are glazed by EXPI-DOOR® with 1" thick clear tempered insulated glass, and if needed, glass is available in Bronze Tint, Low-E, or both for additional cost.
